

DILANG is an educational NFT game L2E\P2E designed for learning foreign languages on the Avalanche blockchain, simulating real-life scenarios in a gaming\educational format, ideal for families, corporate clients, and tourists traveling around the world who wish to learn a foreign language!

Most importantly, DILANG is not just a gaming simulator; it also serves as a platform for charity and support for those in need. With the help of the smart algorithm DILFOUND, every time you earn DILPOP, 0.1% automatically goes to charitable funds. These funds, including the International Red Cross, UNICEF, and others, use these funds to help children, animals, the sick, and refugees worldwide. Thus, every step you take in DILANG benefits and changes the world for the better!

Students who collect a set of NFT charity kits receive the status of an honorary participant and the opportunity to participate in the distribution of funds within the DILFOUND algorithm funds!

Top 10 charitable funds to which DILFOUND can allocate funds:

1. International Red Cross
2. UNICEF
3. Orbis International (Eye Treatment)
4. World Food Programme (Hungry Children)
5. amfAR (AIDS Foundation)
6. Global Fund for Women (Supporting Women in Crisis)
7. Save the Children
8. World Wildlife Fund (Animal Protection)
9. American Cancer Society
10. International Rescue Committee (Refugee Aid)

The DILANG gaming simulator addresses several global issues at once, aiming to help the world and charitable funds. On the one hand, DILANG breaks down language barriers, opening doors for communication and cooperation between people from different countries and cultures. On the other hand, it promotes education and self-improvement, helping people acquire new skills and unleash their potential. But most importantly, what DILANG brings to the world is a culture of charity and social responsibility. With every task completed in the game, a portion of the funds is directed to charitable funds, helping those in need and making our world better and kinder.
